Approved applications for French Selective Development as of March 31, 2011 are listed below. Convergent projects must have a traditional broadcast component and a rich and substantial digital media component. Approved applications are shown with the title of the convergent project, the applicant production company, region of production, project component viewing platform, the content type of the digital media component, and the amount committed to each component. If the digital media component receives no funding from the CMF, it will not appear on this list. For inter-provincial co-productions, the region of control reflects the residence of the majority co-producer and the location of principal photography.
